

# 1.5G 4W 12CH VTX

## 1.Description:

The 1.5G 4W 12CH VTX is a high-power transmitter. It can be connected through terminals and used in connection with stacks and VRX, making it a high-precision flight accessories.

Supports channel output from 1400MHz-1700MHz and change the channel through press the black button for better flight experience

## 2, Specification:

- 1)Frequency:1.4~1.7GHz
- 2)Received signal:synchronous transmission of audio and video,image.
- 3)Video input level:1Vp-p
- 4)Audio input level:1Vp-p
- 5)Transmission frequency:1405/1430/1455/1480/1505/1530/1555/  
1580/1605/1630/1655/1680(MHz) 12CH
- 6)Working temperature:-20~+50°C/-4~+122°H
- 7)Operating humidity:85%RH
- 8)Storage temperature:-40~+80°C/-40~+185°H
- 9)Weight:63g
- 10)Voltage:12V-26V
- 11)Current:680mA
- 12)Transmission power:4W
- 13)Volume:104\*36\*14mm
- 14)Outdoor aerial photography distance in open spaces:50-70KM
